

Eritreans are as endangered as wild animals hunted by PFDJ & its Leader PIA.

In the month of December, we as people should reflect on the past 11 months, and promise to our selves what we should be our next program or the new idea for the coming year. It is sad we cannot invent new ideas or technical objects in the era of PFDJ, Isaias Afewrki and his global fund raisers institutions. I am worried for our future existence as people and as members of the animal kingdom. Well, have we the warranty to continue our existence as people of a nation for the coming years? We will see together the challenges we are facing at the moment.

Endangered Animals of the Universe:

Imaging of the Dynasaures, the mammoth and the wild life in the Jungle of Newzealand, after the intrusion of Humans in those beautiful Islands. Some of our islands are already deserted with the same phenomena, humans endanger indogeneous wild-life, and finally they themselves disappear or are lingering with an unknown epidemy. This is the situation happening in Eritrean history today. The famouse quotation of H.I. Haile Sellasie "We do not need the people of Eritrea but simply we need the land we most desire for its sea outlet".....end quote.

Guess what....Isaias Afewerki did say similar things when Eritrea was totally controlled by the winning EPLF fighters, but he said specifically we do not need these youngsters who were born and brought up under the DERG..... well the difference is of a small margin but the intention is the same, however his intention is far going. Today he is drying the sea of Eritrean people in order to kill its youth and resources. How cruel can someone be to destroy a country and its people, after all those years yearning for freedom and justice, however we are far off the achievements.

The Boss

The EPLF in the seventies and eighties was lecturing us on its purity and clean political maturity, but today it is leaking what it has rejected as failed politics and unfit to most of the people where revolutions has been going on in the Post Independence era. Today its leader is repeating those mistakes he claimed that his Liberation Front (EPLF) wouldn't do at all.

Yemane & Yemane.....

The two important gardian angels of PIA are both Yemane & Yemane, who go an extra mile to dis-inform people and let us sway from what we are doing for the well being of our country, Indeed it is apparent that their names are similar and they act as the head and tail of a coin in defending their padrone or the boss.

The Angels of death Yemane Ghebream & Yemane Ghebremeskel.....

ኢሳይያስ ምስ ፕረሲዳንት ምስሪ ኣልሲሲ

Flirting with everyone who would pay the cost of his terrorist guns and arsenal.

Gold Finger Hagos Ghebrihiwet.....

As the topic explains it, the ideology of total annihilation and creating unrest and destruction to our neighbours is still lingering. The support given to groups like the Al Shebab, The Hutis of Yemen supported by Iran, the connection with Al Qaida & Shebab entities in the Horn, is a typical of the PFDJ's day dream and their Leader. He promised our neighbours that he will create a Quagmire in Somalia for their soldiers. Did he mean it? I guess he did and has done that in deed up to a certain period with the support of some Gulf State and some rich Petro Dollar Princes. The Somali people were the once who have paid their sacrifices and still paying with their blood.

The head of the finance Hagos, Aba Hana is determined to keep the finances of PFDJ under the scrutiny of stashing it in foreign banks or invest it far from the Eritrean shores, as far as China and Maladives. The cost of retaining the lost wealth; by these gangs will be tremendous to the coming generations, if they can claim and try to retain it. Once the thief of Bagdad is behind Bars, the new cashier is acting as the coffers of the National Bank of a virtual State. Corrupting business men and Generals, he is also acting as the Spin Doctor for the Boss. Gold Bars and unprocessed Ore of different precious metals are seen shipped during the nights through Massawa Port.

Completing the monopoly process, Hagos Kisha is the sole treasurer of the Rasputin of modern

Eritrea. Isayas Afewerki. His machination and misleading acts remind me of the Russia under the Czars, with Rasputin doing all the evil manipulating things, and getting away with it without any punishment.

A survivor is always a survivor, and is giving his services to those who can pay more than the others.

His media use to suite him when he is cornered and in times of UN sanctions he welcomes even Iran TV, Al Jazira and CNN. The BBC was also welcomed despite its background as the British mouth piece and western Media as such, was there for his propaganda purpose.

Interview with his own media personnel at a short circute TV broadcasting.

Flurting with every body who comes with Coffers full of Dollars and amunitions to his support. The situation in the Horn of Africa is as volitile as it was in the Zemene mesafnti of Ethiopia. Regional rivalry continues un abated, including the meddling of the Saudi Monarch and Egypt's Nile Dam opposition and the Coalition of the evils in Yemen. It seems that Somalia is heading to normality but stil terror and bloodshed is there. The most endangered people are offcourse, the Eritrean and South Sudanese due to their unexperienced political maturity and being naive in the Politics of the Horn of Africa.

But the most endangered animals in this world are the Eritrean people of today, thanks to our Political Leadership.

Refugee Crises: The tragedies push the known number of asylum seekers who have died attempting to reach Europe this year to more than 4,000, with 2016 now officially the deadliest year on record. Carlotta Sami, a spokesperson for the UN Refugee Agency (UNHCR), announced on Thursday that at least 239 migrants had died in two shipwrecks. She said the information was confirmed by two of the 31 survivors brought ashore on the Italian island of Lampedusa, who said their boats overturned in rough seas. An information bulletin given to search and rescue boats by Italian commanders said one rubber boat capsized off the coast of Libya on Wednesday morning while carrying more than 120 people. Survivors from one dinghy, whose passengers included about 20 women and six children all believed to be from West Africa, said they set off from Libya at about 3am local time (5am GMT) on Wednesday. The boat sank a few hours into its journey. A commercial ship and the *Siem Pilot*, operated by EU border agency Frontex, were among those deployed and rescued almost 30 survivors but up to 100 passengers were feared to have drowned. Twelve bodies were recovered, including three babies.

A female doctor speaks with women aboard the Topaz Responder ship run by Maltese NGO Moas and the Italian Red Cross during a rescue operation of migrants and refugees (Getty).

The regime is not going to change a bit, but the suffering people of Eritrea must come to their senses, somehow. There is no solution in sight, but every concerned Eritrean must think about and decide to bring change in what so ever capacity.

Polarization and creating a big political gap is not helping us anymore, the only chance of survival as a people of a nation is to go back to the Drawing Board and Plan a way out in a form of Reconciliation, Unity and Trust building among us. We Need Not waste our Time. We are all becoming the endangered Animals in this Universe.

From here to Nowhere!

The situation and the curse we are experiencing leads us to a defragmentation and miscommunication among our society. As many as 40 political and civic organizations rise up and fall down, eventually disappearing in the cloud. What happened to the proud youth of the 60ties Eritrean students and workers associations. Where are the lessons of that era? Have we not yet learned from our mistakes and challenges? Beware of the evil-ghedli ideologies!

The Vicious Circle:

There was no ideological differences among our Liberation Fronts in their organizational make up, but there were individual and personal conflicts. Yet 30 years later we still have those impacts in our political formation and organizational structures.

It is simply that history does repeat itself again in Eritrea. The history of the 40ties and 50ties came back to torment us all again.

The Eritrean people are tormented and hunted by the alien regime, these war mongers and hooligans, who banish us to death. What would be the future of our country and its people after the leadership is gone away or gone for good? Would anyone forecast what the coming years are going to yield? I wouldn't dare to bet on!

Well, I guess we can try to change our attitude and learn from past mistakes and start to believe that we can be the makers of change that we long for, an independent Eritrea and accommodate every Eritrean equally in his own country and contribute for a change. This is not as simple as it may sound, but let us start with our selves and combine our forces. The reality is not easy to be done as it is said to be, maybe trying would not be a shame after all.

I wish you all a jolly good new year 2017

T.Yitbarek
